Moxitek Web Maintenance

With the maintenance program, we take care of Updates, Performance, Security, Backups and value-added Plugins

Optimize site performance

We optimize your site and you can run a page speed test using Litespeed cache, check site response time, and get itemized insights into areas of performance that can be improved.

We manage your site backups

Easy peace of mind for you and your clients. We manage and schedule automatic backups and restore saved backups at any time should an issue occur.

Instant uptime updates

We monitor your website in real time and are notified if the site goes down.

Safe & automated updates

We safely and securely update all of your sites, plugins, and themes at your choosing.

We harden your site security

We run and schedule security scans, you can get an overview of security issues and suggested tweaks, restrict IP's across all your sites with global block/allow lists, and we keep on top of threats. Our Antivirus runs scans to make sure your site is not infected with Malware

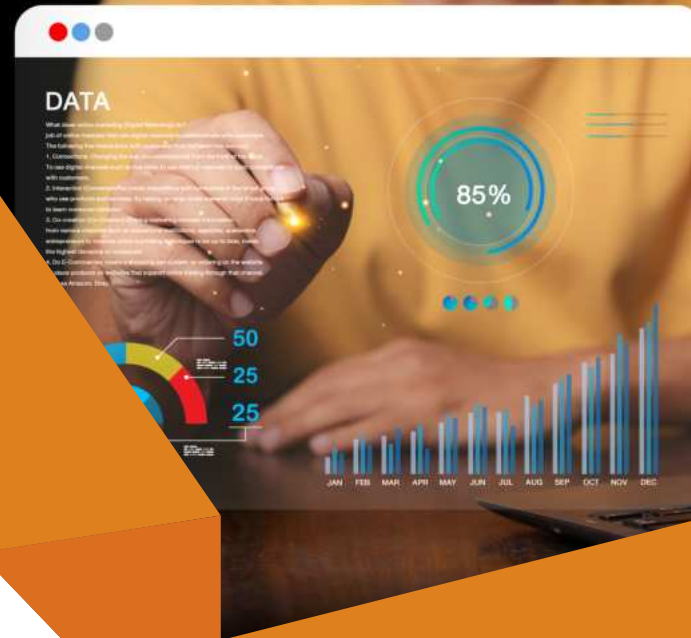

Track & optimize your SEO

We ensure your sites are SEO friendly and recognized by Google with our MoxiSEO plugin. We schedule and run an SEO health check. (This is different to our keyword ranking SEO service)

Our Website maintenance program also comes with several WordPress extensions. See below for the full list. We continue to add value with our extensions.

These are some of the things we install for you when you get the Web maintenance package to make sure your site is fully optimized and running smoothly

Litespeed Server

One central dashboard to monitor, analyze, and optimize the performance of your website. Using the blazing Litespeed server, you get.

MoxiSEO

MoxiSEO is an AI-powered, all-in-one SEO suite that takes the guesswork out of search engine optimization.

Get the perfect SEO setup - instantly! Over 650 features pre-configured for you during install.

All hand-holding. Completely educational. MoxiSEO provides a fail-proof, paint by numbers way of managing and improving your site's SEO.

Use one tool for keyword research, content optimization, SEO settings, technical SEO, site audits, rank tracking, and more

MoxiReset

We're thrilled to offer MoxiReset, the ultimate plugin that allows you to manage your WordPress sites with confidence and ease. With features like one-click restoration, effortless plugin installations, and an emergency recovery tool, you can focus on what really matters while MoxiReset takes care of the technical details.

Security Ninja

Complete WordPress site protection with everything you need to protect your website from hackers and spammers.

Malware Scan

Scans your website to check for any malicious code infecting your website.

Country Blocking

Block visitors by countries you do not want to access your website.

Plugin Integrity Checker

Checks the installed plugins and verifies plugins from wordpress.org has not been modified - an early warning sign of malicious code.

Vulnerability scanner

Warns you if you have vulnerable plugins installed on your website.

Change login URL

Make it more difficult for the scripts to find and attempt to log in to your website.

Block 600+ million bad IPs

A list of known bad IPs is updated twice daily - block bad bots and spammers from accessing your site.

Redirect blocked visitors

Don't want blocked visitors to even see your website? Redirect them to any URL you wish.

Block Suspicious Requests

Block requests from visitors that include malicious requests.

Moxicache

Easily enhance your website's performance using Moxicache. No need for technical expertise—just a few clicks will help you attain exceptional speed and optimize your core web vitals.

Why do people adore Moxicache?
